

INDEX TO VOLUME 18

JANUARY – DECEMBER, 1972

A	Page	Coil-coating. Recent developments in	198	Emulsion cleaners. Effluent treatment of	385
Air oxidation process for the destruction of organic pollution in water. An	355	Coil-coating. Recent developments in Part II	250	Exhibition review	206
Aluminium profile grinder. Automatic	341	Complete zinc plating range	108	F	
Analysis of metal finishing effluents. Ion selective electrodes for	265	Continuous plating of wire. The Conveyorised oven helps maintain TV set quality	344	Filtration problem. Ultrasonics solve	315
Annual Conference of the Institute of Metal Finishing, May, 1972	162	Corrosion inhibitor. New-type	139	Finishing news review 24, 45, 80, 149, 180, 211, 253, 297, 325, 362, 392	
Apex-Warren sampler for water, trade effluent and sewage, The	358	Cutting oil reduces cutting time and improves tolerances	145	Flame-sprayed deposits. Measurement of bond strength	40
Application of linear thrust units to work transporters on metal finishing plant, The	143	D		Fully automated effluent treatment plant	246
Automatic aluminium profile grinder	341	Discharge problems. The role of ion exchange in resolving	279	G	
Autumn Meeting of Cert.	205	Developments in coil-coating. Recent. Part II	250	Grinding and polishing large diameter vessels	377
B		E		Growth of stainless steel in industry - the contribution made by polishing	177
Barrel plating. New design for rack and	383	Effect of cathode rotation in electrode position	11, 32	H	
Basket anodes containing 'S' nickel. Recommendations on the use of	36	Effluent Control	294, 323, 359, 389	Hardness of electrodeposited metallic coatings. The	334
Blast cleaning and allied processes. Review of book	255	Effluent treatment in steel works	276	I	
Brighter Nickel?	152	Effluent treatment of emulsion cleaners	385	IMF A.G.M. & Luncheon	44
C		Effluent treatment process and their economics	316	Industrial finishing and anti-corrosion exhibition. (Survey of Exhibits)	124
Cadmium and zinc plating for the protection of steel. The choice between	304	Effluent treatment processes and their treatment survey: Part 1	223	Innovation in electroplating	372
Camel back oven for expanding finishers	111	Effluent treatment survey: Part 2	265	Institute of Metal Finishing. Annual Conference, May 1972	162
Cathode rotation in electrode position. Effect of	11	Electrodeposited metallic coatings. The hardness of	334	Interfinish 72 and Surface 72. A look-around with 'Platelayer'	307
CERT. Autumn meeting of	205	Electrodeposition. Effect of cathode rotation in	11, 32	International Paint Show. 'Mr. Rust' at	384
Cheaper pickling without fumes	78	Electrodeposition of ternary alloys of nickel-iron-cadmium from the sulphate bath	65	Ion exchange in resolving discharge problems. The role of	279
Chlorine and sulphur dioxide in the treatment of cyanide and chromium wastes	232	Electrodeposits by a dilatometric method. Measurement of internal stress in	92	Ion selective electrodes for analysis of metal finishing effluents	265
Choice between cadmium and zinc plating for the protection of steel. The	304	Electrodip protection	148	L	
Coating line installed. New	378	Electroformed strip and electro-formed components. Production and uses of	71	Large diameter vessels. Grinding and Polishing	377
Coatings. Wear-resistant	146	Electronics company. Plating plant for International	8		
Code of practice for refinishers	147	Electroplating. Innovation in	372		
		Electrostatic spray application of epoxy powders. Preparation of metal surfaces for	172
